## TALASOTERAPIA CANARIAS

Thalassotherapy is one of the world's most natural and effective anti-stress treatments and is totally compatible with the human organism. Treatment is based on bathing in seawater heated to 33°C, which allows the skin to absorb elements found in abundance in seawater, such as iodine, sulphur, calcium and magnesium. These elements make up for the lack of salt and minerals caused by stress and fatigue in the human body, helping to bring about a speedy recovery of the nervous system. Thalassotherapy is highly recommended not only for stress-related problems but also helps to prevent and provides relief from all kinds of pain related to rheumatism, arthritis and bone and muscle conditions. Treatments using thalassotherapy are also advised for respiratory diseases, skin care, relaxation and general well-being.

Our two Talasoterapia Canarias centres, at **Gloria Palace San Agustin Thalasso & Hotel** and **Gloria Palace Amadores Thalasso & Hotel**, both offer a wide range of treatments. In addition to traditional thalassotherapy treatments, they provide a broad range of beauty, relaxation and aesthetic treatments. The centres are equipped with the renowned Get in Shape pools, large relaxation areas, cubicles with bathtubs, massage facilities, aesthetic treatments, saunas, special showers and much more, all within a setting which boasts spaciousness, modern décor and sea views. All our therapists, masseurs and aesthetics staff are qualified and have proven experience and professionalism. The team is led and supervised by our doctor. We offer individual treatments as well as cures ranging from 3 to 12 days.
